

## Radial Air Bag Hemostasis Compressor

Rising Band® Airbag radial artery compressor is designed for the puncture site hemostasis after radial artery catheterization. Rising Band® adopts a balloon its compression unit. The elasticity of airbag is compliant to radial pulses. As a result vascular patency is improved while hemostasis.

High transparency material to realize clear vision on the puncture site.

Elastic balloon to improve vascular patency.

Order Number	Product Name	Indication	Applicable Range	Shipment Package
ZXD-I	Radial Air Bag Hemostasis Compressor	For hemostasis after radial puncture	Height: 140cm~200cm Weight: 40kg~110kg	80cs/carton
